9. INTRODUCTION

According to the World Bank, the MENA region is the hottest and driest region on Earth, making it one of the most susceptible regions to climate change impacts. These impacts can include the exacerbation of food and water scarcity, driving conflict and instability, as well as migration and displacement. Despite the consequences of climate change in MENA, Arab Barometer surveys from 2020-2021 found that climate change and environmental issues are not viewed as a public priority among most MENA countries, as many are confronted with significant daily challenges including violence, poverty and unemployment. However, across the region and globe, youth are increasingly at the frontlines of educating, advocating, and advancing climate awareness and solutions. Examples from the MENA region include establishment of the Arab Youth Climate Movement that includes national chapters in Jordan, Lebanon, Morocco and Qatar, as well as initiatives such as Youth Water Dialogue in Tunisia.

Through the USAID-funded Governance Integration for Stabilization and Resilience in the Middle East and North Africa (GISR MENA) Task Order, USAID is seeking climate and environmental solutions from youth-led or youth-serving organizations (YLOs/YSOs) across the MENA region. Organizations are invited to submit applications for a USAID grant where up to eight organizations will be selected and receive up to \$62,000 to implement their proposed climate

initiatives. Selected grantees will also receive guidance and mentorship from climate experts throughout implementation, as well as organizational capacity strengthening support.

This grants program is funded by USAID and is authorized in accordance with the Foreign Assistance Act. Issuance of this Request for Applications (RFA) does not constitute an award commitment on the part of MSI, nor does it commit MSI to pay for the prices incurred in the preparation and submission of an application. MSI reserves the right to fund all or none of the applications received. All preparation and submission costs are at the applicant's expense.

10. NOFO OBJECTIVES

Through this NOFO, **MENA Youth for Climate Action (MYCA)** seeks to increase financing to and engagement of YLOs/YSOs advancing climate initiatives in the MENA region. The Activity also aims to leverage growing windows of opportunity to increase dialogue and awareness on climate change within the region more broadly.

II. INSTRUCTIONS TO APPLICANTS

MSI will review applications on the basis of the criteria and instructions set forth as follows in this document. To be considered for award, offerors must respond to all of the requests and requirements of this Application to the best of their ability, including those which must be provided through MSI's online procurement system, GRUMP.

1. NOFO Contents

Offerors are advised to review this document and the information provided on MSI GRUMP, particularly the following sections, which are required for successful submission of applications.

- **Prerequisites:** All offerors interested in submitting proposals in response to this RFP must review and accept the requirements listed in the “**Prerequisites**” section of this business opportunity in MSI GRUMP.
- **Submission:** Please submit your technical applications by uploading them via the “**Questions**” section of this opportunity in MSI GRUMP.
- **Items:** After uploading your proposal files in the “Submission” section, please enter the total price or cost of your offer in the “**Items**” section.

2. Award Information

a) TYPE OF AWARD

MSI anticipates awarding Fixed Amount Award grants (FAAs) to meet the objectives detailed in Section III.

b) NUMBER AND SIZE OF AWARD

Grants to be awarded under this NOFO may vary in size from **USD 50,000 to a maximum of USD 62,000**. A grant of a value lower or higher than this range may be considered based on the discretion of the Grant Evaluation Committee (GEC).

c) STAGES OF SELECTION

This NOFO will follow a two-step selection process:

STEP 1 - Concept Note Stage

Applicants will only submit a concept note for Step 1 of the selection process using the **Annex I template** provided in “**Buyer Attachments.**” Organizations will be shortlisted based on the evaluation criteria set forth in Section 4 below and will be recommended for moving forward to the co-creation process.

STEP 2- Co-creation Process

If selected to move forward at the end of Step 1, applicants will be invited to participate in developing a complete activity with assistance from MSI, including two climate and environmental experts who will help the applicant in completing and submitting a full technical and price application. For information purposes only, details on the cost application are included below. Applicants are **NOT required to submit this during Step 1.** Only shortlisted applicants that have moved onto Step 2 will work with MSI to complete the cost application and technical application.

- *Cost Application:* For applicants that have moved forward to Step 2, the cost application shall be submitted as an excel using an MSI template that will be provided. All grants will be awarded in local currency ONLY. Cost applications must include the total cost necessary for the implementation of the grants program your organization is proposing, and detailed budget notes to explain the unit rates and number of units proposed. Detailed budget notes should describe each proposed budget line item -- including the basis for each price, and provide a justification for why the line item is needed for the program. The evaluators should be able to identify from the cost proposal a direct link to the proposed activities.
- For successful applicants, to establish cost/price reasonableness, applicants may be requested to provide evidence and supporting documentation for the costs to be incurred and budget items. Evidence that may be requested includes pay slips, employment contracts, lease agreements, the organization’s internal policies, etc. All costs budgeted must be reasonable, necessary to the proposed project, and allowable (no interest expense, fines, penalties, alcohol or entertainment). No profit or fee can be included in the budget nor paid for with grant funds.
- The budget may include the following categories of costs:
 - Personnel: Salaries, Wages and Fringe/Benefits. This covers salaries and fees for personnel involved in project implementation. For regular staff, information must be provided on specific roles/responsibilities on the project, salary, and percentage of time the person will be working on the project. For short-term consultants, information must be provided on

specific services to be rendered, daily or hourly rate, and number of days/hours to be worked on the project. Any associated taxes required by local laws must be included in the salary and fee rates. Social benefits/fringe must be shown in a separate budget line. Biographical data sheets are required for staff included in the budget (using the form found at <https://www.usaid.gov/forms/aid-1420-17>). Applicants may be required to provide supporting documentation justifying salaries or rates (such as pay slips, employment contracts, etc.).

- Travel and Transportation. Applicants should justify any in-country travel budgeted and provide detailed information on the kind of travel, purpose, and associated expenses (e.g., origin and destination of travel, type of transportation, etc.).
- Supplies/Equipment. Applicants should estimate expenses for supplies and general equipment maintenance during the period of the project (e.g., pens, paper, cartridges, etc.). If the applicant requests office equipment to be purchased or leased (e.g., computers, printers, telephones, fax machines, copiers, etc.), detailed explanations must be provided describing the kind of equipment needed and how it will be used for the purpose of the project (note that the purchase of used equipment is not authorized).
- Other Direct Costs (ODCs). This category includes other costs associated with implementation of the project that are not included in any other cost category specified above, such as training workshops or conferences; office/facility rent; communication and post-office expenses; photocopying, printing, and publishing; translation costs; bank charges; and other expenses essential for project implementation. The budget notes should provide as many details as possible. For example, costs related to training workshops should specify the expected number of participants, duration of the training, location of the training, site costs per participant or per day, etc.
- Cost Share. We encourage applicant to explore different cost share possibilities within their organization as well as pursuing other potential donors that could contribute to project costs. This contribution may be in cash, goods, or services. For instance, the cost share may be in the form of funds from other (non-US Government) donors; it may be the labor of grantee employees or volunteers (time sheets may be required to substantiate); or it may be the use of a grantee's meeting room to hold a workshop for the grant project. Full guidance on cost share, including

allowable and unallowable cost share, reporting cost share, and links to US Government regulations on cost share will be provided.

d) APPLICATION REVIEW AND AWARD

MSI anticipates reviewing concept note applications within one week of the closing date of this RFA. Following that, shortlisted applicants will be notified to move forward to a co-creation process (approximately two weeks) with MSI. Once the co-creation process concludes, the Grant Evaluation Committee will review organizations' technical and cost applications to determine selection for award. MSI expects to issue around eight grant awards thereafter.

e) EXPECTED PERIOD OF PERFORMANCE OF AWARD

September 26, 2022 – May 31, 2023.

f) COST SHARE AS PART OF AWARD

Cost-share contribution represents the portion of a funded project that the grantee can contribute to share the costs of meeting the objectives of the project outlined in the grant agreement. Applicants are encouraged to contribute cost share. The cost share contribution can be from grantees own resources or other non-US Government funding that the applicant has access to. MSI will provide detailed guidance to the grantee on what may or may not be considered as cost share as a part of the grant award. While we encourage grantees to include cost share to demonstrate their commitment to the activity, providing cost share will not be taken into consideration as an evaluation criterion.
